INTRODUCTION

The agricultural and food products import series for Alberta was initiated in 1987. The first two reports, covering 1985 and 1986, presented import values by country of origin. For 1987, a special report based on the results of a comprehensive study of international and interprovincial imports was published under the title A Review of Alberta's Agricultural and Food Products Imports During 1987.

The report for 1988 presented information on import quantities and values by country as well as by commodity. The present report covers calendar year 1989 and follows the 1988 format.

SOURCES AND METHODS

By definition, the data presented in this report refer to goods which were brought into Canada in 1989, whether for immediate consumption or storage in bonded customs warehouses. Primary statistics were obtained from the International Trade Division of Statistics Canada. In a number of cases, adjustments and revisions were made to the primary data to arrive at the figures reported in this publication.

Import statistics are gathered by Revenue Canada at entry points and are reported by Statistics Canada on a province of clearance basis, indicating the province in which goods are cleared by Customs. This does not however always coincide with the province in which the goods are finally consumed. Therefore, adjustments are necessary to overcome misinterpretations arising from the interprovincial shipments of imported goods once within Canada's borders.

The information utilized to adjust the Statistics Canada data for Alberta and Western Canada was assembled from diverse sources within Alberta Agriculture as well as other government departments and industry. Some adjustments were based on human and livestock populations, and on consumption data. Sometimes the information required for adjustment was gathered or derived from secondary sources, mainly government publications.

It is relevant to note that the adjustment process does not fully account for value-added activity in respect of further-processed goods that are shipped interprovincially. Further, the valuation of imported goods is based on the General Agreement on Tariffs and Trade code system which generally requires that the value for duty be equivalent to the transaction value or the price actually paid or payable. Import values reported herein therefore exclude the freight and insurance costs in bringing the goods to Canada from the point of direct shipment, and are attributed to the countries in which the goods were produced, grown, manufactured or extracted.

IMPORT OVERVIEW

The value of Alberta's 1989 imports of primary and processed agricultural and food products from all non-Canadian sources was estimated at about $634 million, compared with $602 million in 1988. The largest commodity categories, in terms of import value, consisted of those products that are not easily produced or raised in this province.

Fruits, vegetables and their preparations, at $250.2 million, accounted for nearly two-fifths of the import total and constituted the largest commodity category. Whiskey, wine, beer and other alcoholic and non-alcoholic beverages made up a further 8.8 per cent of imports, at $55.7 million.

Imports of fish and marine animals totalled $47.4 million while animal and meat imports amounted to $54.6 million, making up 7.5 and 8.6 per cent, respectively, of the import total. Cereals and cereal product imports exceeded $47.7 million, with other foods and food materials totalling $92.9 million. Coffee, tea, spices and soup preparations were major items in this category.

Overall, Alberta accounted for an estimated 7.9 per cent of the Canadian agricultural and food product import total of $8,049 million.

TRADING PARTNER REVIEW

In 1989 the traditional sources of agricultural and food imports accounted for about $439 million worth of shipments to Alberta, 69.3 per cent of the import total for the year. These countries include the United States, United Kingdom, West Germany, France, Brazil and Mexico.

United States

As in past years, the United States was the largest source of agricultural and food products imported into Alberta during 1989. It accounted for $355.6 million, or about 56 per cent, of total imports. The major import items included fruits, vegetables and preparations thereof at $161.9 million (45.5 per cent), cereals and cereal products at $36.3 million (10.2 per cent), fish and marine animals at $23.8 million (6.7 per cent), and alcoholic and non-alcoholic beverages at $14.0 million (3.9 per cent). Miscellaneous foods and food material imports, including coffee, spices, chocolates and other cocoa products, tomato ketchup and other sauces, pasta, and protein concentrates amounted to $27.3 million in total.

Brazil

A distant second to the United States, Brazil supplied $20.9 million worth (3.3 per cent) of agricultural and food products to Alberta in 1989, down from $22.2 million in 1988. Import items consisted mainly of fruits, vegetables and their preparations, and coffee beans.

United Kingdom

Agricultural and food product imports into Alberta from the United Kingdom totalled $18.6 million in 1989, down slightly from $18.8 million a year earlier. Whiskey, gin and other beverages, sugar confectionery, specialty food items like tea and chocolate, and cereal preparations such as sweet biscuits, waffles and wafers constituted about 86 per cent of the import total, at a value of $16.0 million.

France

Imports from France were valued at $18.6 million, or 2.9 per cent of the total Alberta imports of agricultural and food products in 1989. This compares with $15.4 million (2.6 per cent). Wine, beer, cheese, sugar products, cocoa products and animal feed preparations constituted the majority of these imports.

Australia

Imports of Australian food and agricultural commodities amounted to $18.8 million, almost unchanged from $18.9 million in 1989. Raw cane sugar and fruits constituted the bulk of imports.

Mexico

Mexico accounted for 2.1 per cent of Alberta's 1989 agricultural and food products imports, at an estimated $13.5 million. The main import items included fruits and vegetables, coffee, and alcoholic beverages.

West Germany

Alberta's imports of agricultural and food products from West Germany in 1989 was estimated at $12.0 million, down from $13.2 million in 1988. Grape wines and beer constituted a significant proportion of the imports.

Others

A substantial number of other countries supplied a wide array of commodities to this province in 1989. Generally, many of these countries control small but stable niches in the Alberta and Canadian markets. Principal among them were Italy ($10.6 million), The Northerlands ($10.4 million), Colombia ($9.6 million), Chile ($8.6 million), China ($8.4 million), New Zealand ($6.9 million), Spain ($6.8 million), Thailand ($5.6 million), Puerto Rico ($5.6 million) and Cuba ($4.4 million).
